SUMMARY

AI Developer specializing in Generative AI, LLMs, Retrieval-Augmented Generation (RAG), prompt engineering, and semantic search. Proficient in Python, Java, SQL, LangChain, Langflow, vector databases, and REST API integration. Delivered two LLM applications during a Generative AI internship at Testleaf, working in a 6-member engineering team on sprint deadlines. BCA graduate eager to contribute to AI-driven software while continuing to learn emerging technologies.

TECHNICAL SKILLS

Generative AI: Generative AI, Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Chatbots
AI Tools & Frameworks: LangChain, Langflow, Embeddings, Vector Databases
Programming: Python, Java, SQL
Data & APIs: JSON, REST APIs, API Integration, MongoDB
Other: Semantic Search, Machine Learning, DeepEval, Git, GitHub

INTERNSHIP EXPERIENCE

Generative AI Intern — Testleaf Software Solutions, Chennai, India Sep 2026 – Dec 2026

- Built and shipped 2 production LLM applications (Resume Screening Assistant, Intelligent PDF Q&A System) using Python, RAG, and prompt engineering, reducing manual document review effort by 40%.
- Designed end-to-end AI workflows spanning document ingestion, chunking, vector embeddings, and semantic retrieval, improving relevant-result retrieval accuracy to ~90% on internal test queries.
- Integrated REST APIs, Langflow, and MongoDB to automate AI pipelines, cutting manual pipeline configuration time by 30% and enabling reuse across 2+ projects.
- Collaborated cross-functionally with a 6-member engineering team to deliver features on sprint deadlines, using DeepEval to benchmark and validate LLM output quality, reducing post-release defects by 20%.

PROJECTS

QA Bot | Generative AI Project

Technologies: Python, LLMs, RAG, Prompt Engineering, Embeddings, Langflow

- Developed a Generative AI-powered Question Answering (QA) chatbot using LLMs and Retrieval-Augmented Generation (RAG).
- Used embeddings and vector search to retrieve relevant information and provide context to the LLM.
- Designed prompts to generate relevant and context-aware responses to user queries.
- Built the AI workflow using Langflow and integrated the key RAG components.

Resume Assistant | Generative AI Project

- Engineered a RAG-based resume screening assistant that ingests and indexes candidate resumes in a MongoDB vector store, cutting recruiter search time from manual review to seconds per query.
- Implemented semantic search over embedded resume data, surfacing top-matching candidates for recruiter queries with 85–90% relevance accuracy.
- Automated the ingestion-to-retrieval pipeline end-to-end using Python and LLMs.

EDUCATION

Seethalakshmi Ramaswami College, Trichy — BCA (Computer Applications) Jun 2021 – Apr 2024

GPA: 8.02

CERTIFICATIONS

- Diploma in Information Technology (DIT)
- Java Backend Development — Greens Technology (Jun 2024 – Dec 2024)
- Generative AI & LLM Engineering — Testleaf (Sep 2026 – Dec 2026)

LANGUAGES

Tamil, English
